Shower enclosures
Showertrays
Bathscreens

The professionals choice

Coram shower enclosures are the fastest and easiest to fit, which is why they are the choice of more professional installers than any other.

 All Coram products are designed and built in Britain to suit British site requirements.

There is a vast selection of shower enclosures on the market, but the majority of foreign manufactured products are not designed to be completely watertight. They are therefore prone to leaks, which on the continent is not a problem, because bathrooms are usually fully tiled with solid concrete floors. In Britain however, where we have wooden floors and carpeted bathrooms, leaks can cause serious damage.

When Coram Enclosures and Coratech® Showertrays are used together their performance is so unbeatable and reliable we offer a watertight lifetime guarantee.

For full details of guarantee see page 43

Contents

PREMIER ENCLOSURES 4

Premier offers all the features shown opposite and is available in a wide range of styles. A choice of glass options and finishes is also available.

Finishes & Selection Guide	4

Coram features

Both Premier and Optima offer the following features:

Pivot: Nylon bush in hinge for smooth and silent operation.

Wall Channel: Generous adjustment for out-of-true walls.

Corner Post for easier installation and out-of-true adjustment in both directions (Premier only).

Handle: All metal chrome handle.

Frame: High quality corrosion resistant aluminium in a choice of finishes - complies with BS6496.

Glass: Toughened safety glass - complies with EN12150 and EN12600.

All glass marked with European Standard to comply with Building Regulations.

The options of plain, overall etched satin glass, or a luxury etched modesty panel design (see page 6 for Premier details and page 25 for Optima details).

All enclosures are power shower tested to BS6340.

All doors can be left or right hand opening.

Coratech® Slimline 60 Showertray

New acrylic capped resin Coratech® showertray, one of a complete range. The only showertray of its kind, as all sizes weigh less than 25kg, light enough to make installation a one person job. (Riser showertrays also available).

Premier Enclosures

The Premier range offers a number of features (see page 3) and is available in all the styles and finishes shown here. You also have a superb choice of glass options detailed on page 6.

All Premier enclosures are 1830mm in height.

Premier Frame Finishes

Available in a choice of polished silver or white frame finishes.

Polished silver

White

Premier sizes and styles to suit all applications

IN AN ALCOVE

All Coram Premier shower doors can be either left or right hand opening and can be used in an alcove.

IN A CORNER

With the addition of a side panel, a Coram Premier shower door can be used in a corner. All Coram Premier shower doors can be either left or right hand opening.

IN A CORNER

For corners there is also a range of angled or curved enclosures.

FREESTANDING

With the addition of two side panels, a Coram Premier shower door can be used to create a three sided enclosure against a wall.

Premier Side Panels

Side panels are available in a range of sizes, finishes and glass options which allow you to create corner enclosures using any of the Premier doors.

Semi-Frameless Side Panels

Premier Glass Options

All Premier enclosures in polished silver are available with the additional option of luxury satin glass, together with a choice of two luxury modesty panels, shown on the right. For corner or three sided enclosures you can have any combination of modesty panels with plain or satin glass - see example above.

For full details and prices see pages 22/23.

Modesty Panel 1

Modesty Panel 2

Premier Walk-in.
Finished in polished silver with plain glass on a Coratech® Slimline 60 Showertray.

When used with a Coratech® showertray.
For full guarantee details see page 43.

Premier Walk-in

Walk-in enclosures are becoming increasingly popular, but they vary greatly in size and how well they use the space. The Premier Walk-in however, provides the maximum showering area whilst using the minimum footprint. Innovative design means that this unique showertray and enclosure optimises the showering area and can be fitted in either left or right hand corners or an alcove.

Height: 1890mm with slimline showertray, 2050mm with riser showertray.
All Premier enclosures can be left or right hand opening.

850 Crescent with a Coratech® Slimline 60 Showertray.

When used with a Coratech® showertray. For full guarantee details see page 43.

NEW

Premier 1200 Crescent. Finished in chrome with plain glass on a Coratech® Slimline 60 Showertray.

Premier Frameless Swing Door with Semi-Frameless Side Panel. Finished in polished silver with plain glass on a Coratech® Slimline 60 Showertray.

When used with a Coratech® showertray. For full guarantee details see page 43.

Premier Crescent

The Crescent offers an extremely stylish corner option created from two beautifully curved sheets of glass. Available in a choice of three sizes from the ultimate luxury of the 1200mm wide model, to the compact 850mm model, which will fit into the smallest bathroom, whilst still providing an ample showering area.

LEFT OR RIGHT HAND SHOWERTRAYS FOR 1200 CRESCENT

Please note that when ordering a 1200 Crescent showertray you will need to select either left or right hand corner options. The image above shows a right hand corner.

Premier Pentagon.
Finished in polished silver with plain glass on a Coratech® Slimline 60 Showertray.

When used with a Coratech® showertray.
For full guarantee details see page 43.

Premier Pentagon

A 900mm wide enclosure that offers you the luxury of extra elbow room without intruding too much into your room. The Premier Pentagon is designed to be used with a 760mm Pivot, Bi-Fold or Frameless Swing Door, which you need to order separately.

GLASS OPTIONS

Satin glass is available together with a choice of two luxury etched modesty panel designs – see pages 6/7 for details.

Nominal Tray Size	Finish	Plain Glass	Retail Price Exc. VAT	Retail Price Inc. VAT
900mm	Polished Silver	PPE 90 CUP	£314.64	£369.70
900mm	White	PPE 90 CUW	£285.40	£335.35

Width Adjustment
868mm - 918mm

Height: 1890mm with slimline showertray (can also be fitted on a riser showertray - for full range of showertrays see pages 32-37).
All Premier enclosures can be left or right hand opening.

Premier Wider Enclosures

The Premier Inline Panels, supplied with an 'H' Section, can be used with any Premier 760mm Door to extend the enclosure width to 1000mm or 1200mm. The width can be extended further by using other doors or side panels, contact our sales office for details.

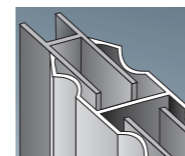

Inline Panel Supplied with matching 'H' Section and Bracket Pack.

Premier Bespoke Enclosures made to order

The Coram Premier range shown here can be made to create virtually any height, width and depth of enclosure.

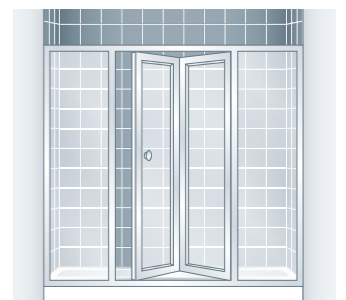

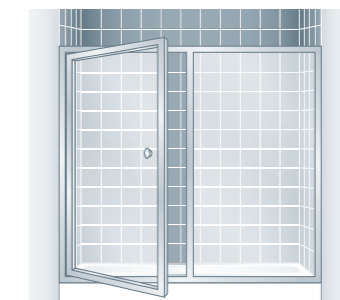

In addition, Pivot or Frameless Swing Doors and Side Panels can be shaped to fit where there are ceiling restrictions.

Availability

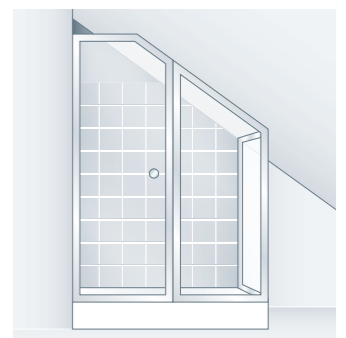

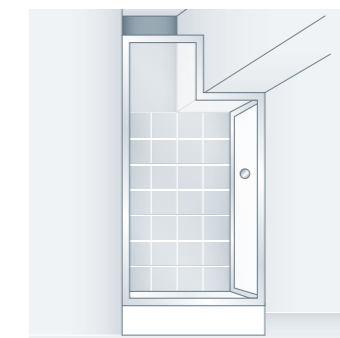

All Coram Premier Bespoke Products can be supplied in a choice of white or polished silver frame finish with plain glass. Once your order is confirmed, you can expect delivery within 4-5 weeks.

For more information and costings please fax details to **01746 764140**.

Email: bespoke@coram.co.uk

For wide enclosures we can provide extra wide doors and additional panels can be used, positioned at either one or both sides of the door.

Pivot or Swing Doors and Side Panels can have 'L' shaped or angled top profiles to fit under stairs or in roof spaces etc.

Premier Glass Options

All over etched satin glass is available as well as a choice of two luxury etched modesty panel designs.

Optima Enclosures

The Optima range provides an economical alternative to Premier with the following features. Available in chrome and white finishes, in the styles and glass options shown here. All Optima enclosures are 1800mm in height.

Pivot: Nylon bush in hinge for smooth and silent operation.

Handle: All metal chrome handle.

Glass: toughened safety glass complies with EN12150 and EN12600.

Frame: High quality corrosion resistant aluminium in a choice of finishes - complies with BS6496.

Wall Channel: Generous adjustment for out-of-true walls.

Coratech® Slimline 60 Showertray

New acrylic capped resin Coratech® showertray, one of a complete range. The only showertray of its kind, as all sizes weigh less than 25kg, light enough to make installation a one person job. (Riser showertrays also available).

All enclosures are power shower tested to BS6340. All doors can be left or right hand opening.

Optima Finishes & Glass Options

Available in a choice of chrome or white frame finishes with plain glass. All Optima enclosures in chrome, with the exception of the Quadrant, are also available with the additional option of luxury satin glass or a luxury modesty panel.

Optima sizes and styles to suit all applications

IN AN ALCOVE

All Coram Optima shower doors can be either left or right hand opening and can be used in an alcove.

IN A CORNER

With the addition of a side panel, a Coram Optima shower door can be used in a corner. All Coram Optima shower doors can be either left or right hand opening.

IN A CORNER

For corners there is also a range of angled or curved options.

FREESTANDING

With the addition of two side panels, a Coram Optima shower door can be used to create a three sided enclosure against a wall.

All Coram products are designed and built in Britain to suit British site requirements.

CORAM Coratech® Slimline 60 Showertrays

The most stylish showertrays available

Coratech® Slimline 60 Showertrays sit just 60mm above the floor. They offer the most attractive installation where the plumbing connection can be recessed into the floor. Each model has been carefully sculpted with subtle angled sides and a shallow sloping circular or elliptical recess. And it's these superb design features which provide truly efficient drainage through the equally stylish top access 90mm chrome domed trap.

Coratech® Slimline 60 Showertray on a plinth

For site conditions, such as solid floors, where the plumbing connections cannot be recessed into the floor, a tiled plinth can be constructed to conceal the plumbing. The Coratech® Slimline 60 Showertray can then be installed on top of the plinth.

Coratech® Riser Showertrays

A Coratech® Riser Showertray offers an easier, lower cost alternative to building a plinth, because the plumbing connections are concealed beneath the 220mm high tray, which offers easy access via removable panels (See page 35).

When Coram Coratech® Showertrays and Enclosures are used together their performance is so unbeatable and reliable we offer a watertight lifetime guarantee. For full details of guarantee see page 43.

Top quality chrome domed trap supplied

Coratech® Slimline 60 Showertrays are supplied with a 'High Flow Trap', diameter 90mm and a 50mm seal, finished in chrome.

All Coram products are designed and built in Britain to suit British site requirements

Revolutionary Coratech[®] resin showertrays

Coratech[®] is a unique resin formulation developed by Coram for use in their showertrays. It has all the strength of traditional 'stone resin' showertrays but without the excessive weight.

A showertray doesn't need to be heavy to stop it moving

We all know that even the slightest movement of a showertray after installation will lead to expensive water leaks. That's why Coram's Coratech[®] trays are absolutely rigid and designed to be fixed in a way which will ensure that there can be no possible movement. The standard trays have adjustable feet, which can be securely screwed to the floor, whilst the slimline trays are bonded to the floor by large fixing pads and the entire rim of the tray.

Why risk injury by lifting trays that are unnecessarily heavy?

The Health and Safety Executive (HSE) recommends that the maximum that is safe for one person to lift unassisted is 25kgs. Most stone resin trays are above this limit and so should be lifted by two people.

Coram's entire range of trays on the other hand have all been designed to be below 25kgs, so the entire range is 'safe' for one person to lift and install.

Coram Coratech[®] Showertray weights All 'safely' under 25kg

CORAM Coratech[®] Riser Showertrays

Quick-fit in less than 20 minutes

The most sturdy legs & feet

The showertray is supplied with factory fitted legs. You simply screw in the hexagonal feet, which can then be simply adjusted by hand to level the tray and the angled screw holes make the feet easy to fix in position.

Rigid easy to trim panels

Unlike many other trays, which have flimsy plastic panels that are difficult to cut, Coram's rigid panels are easy to trim to size.

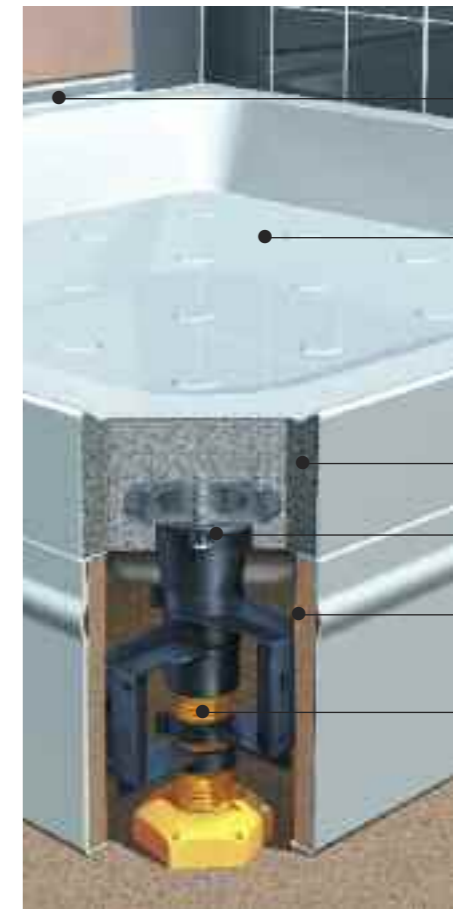

The best panel fixing

The panels are attached with specially designed push-on spring clips that are screw fixed to the back of the panels. These provide the fastest and neatest installation that is far superior to other types of showertray, which have unsightly corner joints and flimsy, poorly fitting plastic panels that need to be fixed with sealant.

The height can be reduced

The height of the tray can be reduced by up to 30mm by using a trap with a 19mm water seal, fully winding in the legs and trimming the side panels.

Upstand.

Hard wearing non-slip acrylic surface with the strength and rigidity of a resin base.

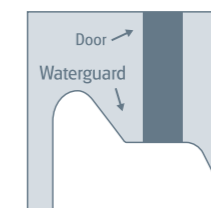

Unique Coratech[®] Resin.

Factory fitted legs.

Detachable push-fit rigid panels.

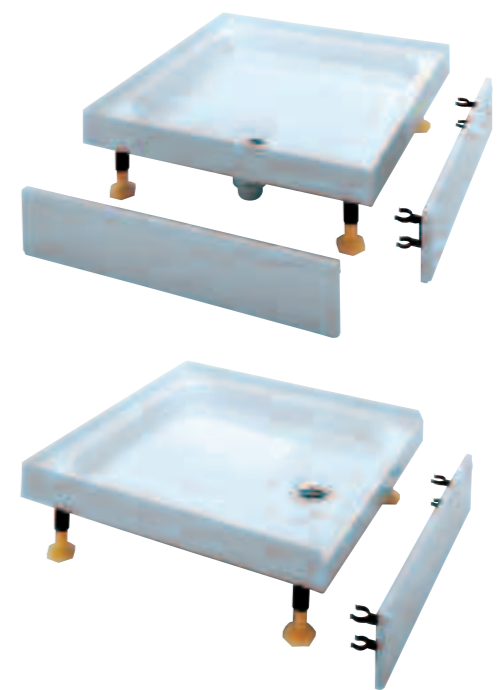

Easy to adjust threaded feet with angled screw fixings.

This product is protected by UK Patent Nos 2318049 and 03275690.

Upstands & Waterguard

Coram's Coratech[®] Showertrays have either 4 upstands, or upstands and a unique waterguard edge to prevent leaks.

Showertrays with 4 upstands & two panels can be used universally.

Showertrays with upstands & Waterguard with one panel designed specifically for alcoves.

CORAM Coratech® Riser Showertrays

For site conditions, such as solid floors, where the plumbing connections cannot be recessed into the floor, a riser showertray offers an easier, lower cost alternative to building a plinth. The plumbing connections are concealed beneath the 220mm high tray, which offers easy access via removable panels (see page 35).

Bathscreens

Coram bathscreens are simply the best designed bathscreens you can buy.

Unique patented levelling system.

High quality corrosion resistant aluminium frame complies with BS6496.

Glass edges are smoothed and rounded.

Nylon bush in hinge for smooth silent operation.

Toughened safety glass to EN12150 & EN12600 in plain glass.

All glass marked with European Standard to comply with Building Regulations.

CORAM (A)
SAFETY GLASS
EN12150-1C

Unique patented levelling system.

Push-on, transparent polymer seal that can be easily removed for cleaning.

Sail.
Finished in chrome with plain glass.

Unique levelling system makes them faster and easier to adjust than any other bathscreens

A single screw can be adjusted to ensure that it fits perfectly in line with the rim of the bath.

This unique levelling system also provides longer lasting benefits. If, for any reason in the future, the screen becomes slightly out of fit, you can simply remove the push-fit screw cap and re-adjust it.

This product is protected by UK Patent No. 0403656.2

Unique, patented levelling system.

Choosing the right kind of bath for your bathscreen

Baths must have a flat rim and should be installed with top edge horizontal. Any water that collects around the taps should then drain into the bath.

Baths must not have raised handles or soap recesses that would prevent the bath screen from providing an effective seal with the rim of the bath.

Failure to comply with the above may cause your bathscreen to leak.

The Bathscreen should be fitted so that the seal is in contact with the inside edge of the bath as shown below.

To ensure it is completely watertight, the seal also features a deflector on the inside edge so that any water from above will drip straight into the bath and not collect on the rim.

You can swing all bathscreens out for easy cleaning.

Frameless sliding.
Finished in chrome with plain glass.

NEW

Unique 'slide and lock' mechanism keeps the screen rigidly in place and perfectly level when fully extended.

Frameless Sliding Bathscreen

A new extremely stylish modern minimalist design, in 5mm safety glass, which offers a host of practical features.

Unlike other sliding screens that tend to sag when extended due to the weight of the glass, Coram's ingenious 'slide and lock' mechanism* keeps the screen rigidly in place and perfectly level when fully extended - providing the best seal with the edge of your bath. It also eliminates any risk of the screen sliding back whilst in use.

The screen slides out easily on smooth action runners and simply clicks into place. It can be extended and pushed back to the wall, without leaving any finger marks, thanks to the discreet chrome handle.

Fully extended it measures 1065mm, making it Coram's largest screen, which provides even greater protection from shower spray. When not in use and pushed back neatly to the wall it takes up only 650mm - offering greater access to your bath.

* This product is protected by patent pending 0810871.4.

Customer Care

Our helpful Coram Care staff are pleased to offer technical and product advice on the full range of Coram shower enclosures, showertrays and bathscreens. So whether you need assistance deciding which door type best suits your needs, or useful installation advice, our fully trained staff are always here to help.

Call direct on CORAM CARE LINE 01746 713410

Coram Showers Ltd guarantees its range of enclosures against faulty materials or manufacture for a lifetime, provided they have been installed on a Coram Coratech® showertray and are used and maintained in accordance with the manufacturer's instructions (guarantee excludes seals and magnets). 'Lifetime' means during the period of use by the original user. When Coram enclosures and Coratech® showertrays are used with any other showertray or enclosure the guarantee period is limited to ten (10) years. Bathscreens are guaranteed for 10 years. This guarantee is in addition to your statutory rights.

PRICES

All prices are recommended retail prices shown both inclusive and exclusive of VAT.

SITE CONDITIONS

Your Coram shower enclosure will give you years of reliable service if the following are observed:

The shower control and sprayhead should not be positioned so that the shower sprays directly onto the door of the enclosure.

It is recommended that the sprayhead is sited as shown, which will make the shower easier to use and ensure watertight performance.

Outward opening doors may drip water onto the floor. Therefore ensure the floor covering immediately outside the enclosure will not be affected by water.

Your Coram bathscreen will give you years of reliable service if the following are observed:

Baths must have a flat rim and should be installed with top edge horizontal. Any water that collects around the taps should then drain into the bath.

FAILURE TO COMPLY WITH THE ABOVE MAY CAUSE THE SHOWER ENCLOSURE OR BATHSCREEN TO LEAK.

All Coram products are designed and built in Britain to suit British site requirements.
