# wet room conversion kit

Wet rooms take contemporary bathrooms to new heights of luxury. The easy-to-install AquaSpace Wet Room Conversion Kit provides a simple way to transform an enclosure into a modern wet room. It can be used with either the AquaSpace Corner Walk-through, the Walk-around or the Walk-in enclosures.

**Wet Room fitting guidelines:**

The Wet Room Conversion Kit is designed to be used in conjunction with a proprietary wet floor solution.

Before fitting the enclosure the wet floor must be prepared. This will involve a waste, appropriate falls for drainage and a sealing membrane. The membrane can be finished with tiles. It is essential the floor is fully sealed before commencing the screen fit. The screen system locates on easy fit wall channels and is retained by curved brace bars. It has a combination of wall channel spacers and adjustable support feet on the outer edge of each screen. This allows the product to conform to a variety of wet floor fall gradients.
