Start:

- 1** Place the tray on the floor. Use a spirit level and adjust the feet to ensure the tray is flat.

- 5** The central control panel and two back panels are in place.

- 9** Slide the clips across. These are located at the end of each rail, top and bottom.

| Product Code | Description | Size | Height | Colour | Glass |
|--------------|----------------------|---------------|--------|-----------------|-------|
| FEN0930AQU | Slot & Lock Quadrant | 900mm x 900mm | 1900mm | Polished Silver | Clear |

2 Using a silicone gun, insert silicone into 4 holes positioned on the perimeter of the top of the tray.

3 Insert the central control panel into the rear 2 holes positioned at the back of the tray.

4 The two back panels must be in-line with the central panel before you slot and lock. The pin on the end of each panel locates into the hole on the front of the tray.

6 Lay the bottom rail on the tray. Ensure rail clips are unlocked.

7 Add the 2 clear glass side panels. They must be in-line with the back panels before you slot and lock into position.

8 Put on the top rail and slot into place.

10 Hang the doors on the top rail using the top bearings.

11 On the bottom bearings depress the section above the rollers to locate the bearings into the bottom rail.

12 Hang the shelving basket on the back panel.

13 Attach the shower hose and position the shower head.

14 On the rear of the unit, silicone between the tray and glass panels. Also silicone from the base up 150mm, where the panels interlock.

15 Clip the top caps into place.

16 Push fit the wall seals on either side of the unit.

17 Mark up and fix the wall bracket to secure the unit to the wall.

18 Push fit the tray skirt and seal around the front of the enclosure using silicone.
