The desire to create and define our own bathing space is becoming increasingly important within our homes. This collection of bathroom furniture from Roper Rhodes has something to fit all spaces, all with the same Roper Rhodes quality.

The timeless versatility of the Valencia range, the understated Shaker lines of New England or the cool and contemporary Eden range will have something to suit all tastes.

The Valencia and New England ranges are abound with thoughtful features designed to make your life simpler.

We have introduced improved closing features to the units ensuring a quieter life is guaranteed. Soft-close doors and self-close deep drawers give controlled and smooth closing action.

All of our mirror canopy combinations have heated mirror pads and lights which are operated by a safe and easy to use no touch infrared on/off switch. In addition to this, the shaver socket can be switched on separately to the lights and heated mirror pad.

The oak and beech finishes in the New England range are made with revolutionary and innovative CFL (Continuous Foil Laminate) finishing which provides excellent resistance to moisture penetration – ideal for use in the bathroom.

You can now make bathing a true back-to-nature experience and escape the stresses and strains of the modern world. Sit back and relax in your sanctuary and find your inner calm...

Look out for the symbols below when making your selection.

VALENCIA

The subtle curves and graceful contours give Valencia a truly refined and timeless appeal.

The Valencia range offers great versatility as it can be used on its own or used to create a sleek, fitted installation which cleverly conceals unsightly pipework, whilst creating a spacious and uncluttered look.

VALENCIA RANGE ELEMENTS

Vanity bases

Beautifully styled units embody simplicity and purity whilst remaining highly functional.

The choice of sizes available provides storage solutions suitable for any bathroom. The Valencia range features doors made from sturdy MDF with a tough, durable water resistant finish. The base unit is constructed from melamine, which has a high gloss finish to match the doors and fascia available in white and pergamon finishes (pergamon available in most sizes and finishes). In addition to the standard format the 700mm, 800mm and 1000mm base units have been designed with two large deep self-close drawers as an alternative option for practical storage in the bathroom. A quieter life is guaranteed, as all doors are fitted with concealed soft-close hydraulic hinge technology to give a controlled and quiet closure (with exception of corner units, which feature a soft-close buffer).

Ceramic integral basins

The stylish ceramic basins complement the clean lines of the base unit, with the option of two different styles of basins to choose from. The elegant form of the Valencia basin or the fluid profile offered by the Eden basin - the choice is yours. Both basins include an integral overflow and single tap hole.

Mirrors & lighting canopies

Mirrors are available for the 500mm units and there are mirrors and canopy combinations available for the 620mm, 700mm, 800mm and 1000mm units. There are two styles to choose from, the full height mirrors which sit on the back of the basin or the shorter mirrors incorporating a useful shelf. The mirror and lighting canopies feature external high gloss finished shelves, fascias and cupboard doors where applicable. The lighting canopies can only be used with mirrors in the Valencia range. All mirrors and lighting canopies are fitted with a power socket for electric shavers and toothbrushes, infrared on/off switch and heated mirror pads as standard.

Back to wall WC units

We have developed back to wall WC units suitable for use as stand alone units or units that can be incorporated into the Linx System. Our optional 500mm back to wall WC unit, with its reduced width makes it ideal for small bathrooms, cloakrooms and en-suites. It saves on valuable space and therefore is incredibly practical. Please see the Range Selector Guide on pages 18-20 for further details.

The Linx System

Fitted furniture maintains its popularity within the bathroom, as it hides unsightly exposed pipework and gives the bathroom a spacious and uncluttered appearance. We have cleverly designed our products so they can be used as stand alone or fitted together using the Linx System.

The Linx System allows our popular 620mm semi-countertop base unit and 700mm, 800mm and 1000mm vanity base units, with their practical slab top style basins, to be incorporated into runs of furniture alongside floorstanding storage units and our back to wall WC units. A variety of worktops, continuous plinths and infill panels complete the look.

Bathroom storage & companion pieces

Stylish yet practical storage space is always at a premium in the bathroom. Beautifully co-ordinated Valencia freestanding units and wall units can provide that much appreciated storage, and will perfectly complement the Valencia vanity units. The tall units are designed to add impact to your bathroom, as well as maximising storage. The short base units can be used as stand alone items or to create a fitted run, using the Linx System. Please see the Range Selector Guide on pages 18-20 for further details.

Worktop options

There are a number of worktop sizes available to suit your Linx installation. All of our laminate worktops are supplied with pre-finished edges and additional end strips should they need to be cut down. Please note, if you decide to use a standard vanity base unit you must select the 19mm slimline worktops. Should you opt for the semi-countertop base unit, you must use the 28mm worktop.

Infill panels, plinths & cistern access hatch

The infill panel, 300mm (w) x 820mm (h), provides the flexibility to design the layout you desire. For a fitted look using the Linx System, various plinth lengths are available. Plinths and infill panels can be cut down to size to suit the plan you have chosen for your bathroom. A matching high gloss white cistern access hatch is available for use with back to wall WC furniture.

Door knobs

All base units are supplied with elegant chrome door knobs. As an optional extra you can choose from any of the five door knob styles. Simply specify the style and number of door knobs you require when ordering (remember to allow for door and drawer knobs).

Door knob options:

1. Tulip
2. Helena
3. Granada
4. Cadiz
5. Cordoba
6. Cordoba - supplied as standard

Brassware

Our collection of designer taps perfectly complements your Roper Rhodes bathroom furniture. Please refer to our Taps & Accessories brochure and make your selection.

VALENCIA STAND ALONE UNITS

Stand alone units offer a clean and cohesive look for your bathroom regardless of its size. If you don't have a large bathroom you can opt for one of our space saving base units. Should you have the available space, select from our wide range of standard size units and create as much storage as your bathroom will allow. For a fully co-ordinated look, the Valencia range offers a matching toilet seat and bath panel.

SPACE SAVING UNITS

With space at a premium in many bathrooms, Valencia space saving units offer useful storage and maximise space in even the smallest of rooms. Shown is only a small selection of possible combinations - for your own personal look please see the Range Selector Guide on pages 18-20 for further details.

STANDARD BASE UNITS USING THE LINX SYSTEM

The Linx System is available in a gloss white finish and allows our popular 700mm, 800mm and 1000mm base units to be incorporated into runs of furniture alongside floorstanding storage units and our back to wall WC units. The 19mm thick laminate worktops are supplied with pre-finished edges in 506mm, 624mm and 1224mm lengths. The continuous plinths come in 920mm, 1000mm, 1100mm, 1300mm, 1540mm and 1600mm lengths.

When installing a fitted run of furniture which includes a back to wall WC base unit, two plinths may be required but the joint can be concealed behind the pan. All furniture units are supplied with a plinth.

Please see the diagram for an explanation of how to assess the required plinth length. Many other configurations are possible, including corner installations by utilising the separately available infill panels.

When planning your installation, pipework runs are an essential consideration.

VALENCIA LINX SYSTEM

Fitted furniture maintains its popularity within the bathroom as it hides unsightly exposed pipework and gives the bathroom a spacious and uncluttered appearance. We have cleverly designed our products so they can be used as stand alone or fitted together using the Linx System.

SEMI-COUNTERTOP BASE UNIT USING THE LINX SYSTEM

The semi-countertop base unit comes in a gloss white finish and is used in exactly the same way as the standard base units, alongside the various floorstanding storage items.

Infill panels, worktop options and continuous plinths complete the look.

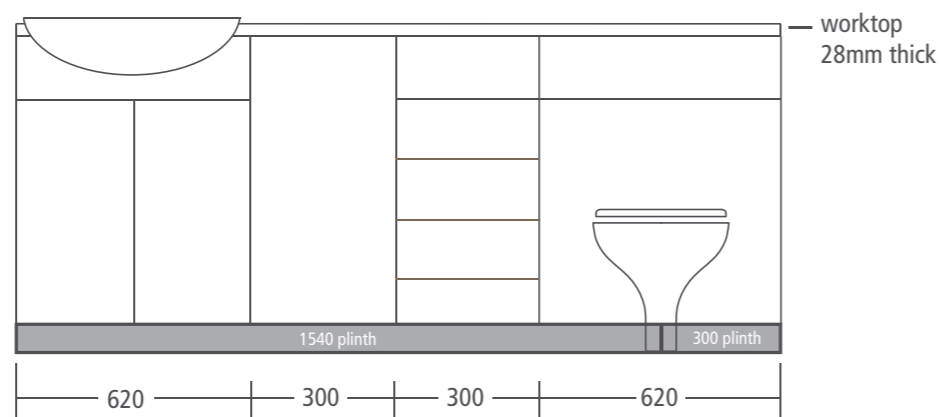

The 28mm thick laminate worktops are supplied with pre-finished edges in 506mm, 626mm, 1246mm, 1546mm and 1846mm lengths.

The continuous plinths come in 920mm, 1000mm, 1100mm, 1300mm, 1540mm and 1600mm lengths.

When installing a fitted run of furniture which includes a back to wall WC base unit, two plinths may be required but the joint can be concealed behind the pan. All furniture units are supplied with a plinth.

Please see the diagram for an explanation of how to assess the required plinth length. Many other configurations are possible, including corner installations by utilising the separately available infill panels.

When planning your installation, pipework runs are an essential consideration.

Shown is only a small selection of possible combinations - for your own personal look please see the Range Selector Guide on pages 18-20 for further details.

1. Soft-close door detail

Concealed soft-close hydraulic hinge technology for a smooth closing action.

2. Deep self-close drawer detail

Large deep drawers have a controlled and quiet closure. In addition to this, there is a useful enhancement feature, which enables you to perfectly align the drawer.

3. White 620mm semi-countertop base unit

(basin not supplied, worktop and plinth to be ordered separately) v79sct £194.30

White 620mm mirror m620w £76.43

White 620mm back to wall WC base unit (pan not supplied, worktop and plinth to be ordered separately) v79btw £194.30

White 300mm floor cupboard v79fcw £129.53

White 300mm linen bin unit v79lbw £176.16

White 300mm drawer unit v79dsw £193.00

VALENCIA FEATURES

1. Valencia ceramic integral basins

The elegant form of the Valencia basin includes an integral overflow and single tap hole.

2. Eden ceramic integral basins

Another option is the fluid profile offered by the Eden basin with its integral overflow and single tap hole.

3. Improved closing features

A quieter life is guaranteed as this range benefits from the added luxury of our soft-close doors and self-close large deep drawers to give a controlled and quiet closure. In addition to this, there is a useful enhancement feature, which enables you to perfectly align the drawer.

4. Drawers

The high quality smaller drawer units have a smooth, easy operation with metal sides and roller runners. The drawers can be removed for cleaning and an internal stop prevents accidental removal.

5. Heated mirror pads

Finally there is a solution to those steamed up and foggy bathroom mirrors. We offer integrated demister pads on our entire range of bathroom mirrors with canopies as standard.

The demister pad will effectively heat the mirror to a few degrees above room temperature within 2-3 minutes preventing the mirror from misting in even the steamiest of bathrooms. Heated mirror pads are switched on automatically with the canopy lights and no additional wiring is required. The demisting effect will spread approximately 10-20% further than the pad itself and is very economical to run.

6. Shaver & toothbrush power sockets

All Valencia lighting canopies are fitted with a power socket for electric shavers and toothbrushes. This is concealed in units with cupboards. As an additional feature of Valencia canopies, the shaver socket can be operated independently to the lights and heated mirror pad. This allows use of the power socket without the canopy lights switched on - a red LED indicates power on/off.

7. Infrared sensor

A safe and easy to use infrared on/off switch enables the user to activate the lighting and heated mirror pad without the need to touch the mirror. Simply move your hand in front of the sensor to activate.

8. Toilet seats

Elegant matching toilet seats are extremely durable and are formed from a tough MDF core which is encased in cast polyester. They are tough, rigid and totally waterproof, with a 'heavyweight' quality feel. Available with chrome plated or gold plated adjustable hinges should you prefer.

9. Bath panels

Bath panels are beautifully finished and designed to fully co-ordinate with the Valencia range. Supplied with adjustable plinth to enable easy installation, especially on baths that are already fitted. Front panels for 1700mm long baths and end panels for both 700mm and 750mm wide baths are available in white or pergamon. Front panels for 1800mm long baths and end panels for 800mm wide baths are available in white only.

Electrical Specification

Lighting canopies: All canopies include shaver/electric toothbrush socket. Lighting canopies can only be fitted to Valencia mirrors.

Electrical specification: Valencia lighting canopies with shaver sockets and heated mirror pads have been designed and independently tested for compliance to British Electrical Equipment (Safety) Regulations 1994. Standards applicable are: **BS EN60598-2-6:1995**, **BS EN60742:1996**, **BS EN61558-2-5:1998** and **BS EN60335-2-30:1997**. Lighting canopies are Class II double insulated - no earth connection required. Canopies are supplied with 500mm cable and should be connected to a fused 3 amp supply. Electrical connections should be made according to national wiring regulations. Installation by a competent electrician is advised. Canopies are suitable for use in bathrooms - but should not be used in a sauna or shower cubicle. Canopies should not be located where they will be directly splashed by shower spray, or such that they can be operated by someone whilst in the bath. Valencia lights use low voltage halogen (12 volt, 20 watt) type G4.

Shaver socket: Suitable for shavers and rechargeable toothbrushes. Maximum power output 20VA. The shaver socket is switched independently to the lights. It is recommended that the shaver socket is switched off when not in use.

Heated mirror pads: Operated automatically when the canopy lights are switched on using the IR sensor. No additional electrical connections are required.

For taps, wastes and traps please refer to our Taps & Accessories brochure.

NEW ENGLAND

The understated shaker lines of New England offers many options. It can be used as a stand alone unit or as a sleek, fitted installation using the Linx System.

NEW ENGLAND RANGE ELEMENTS

Vanity bases

Beautifully styled units embody simplicity and purity whilst remaining highly functional. The choice of sizes available provides storage solutions suitable for any bathroom. The New England range is available in a choice of finishes: oak, beech and high gloss white.

Specially developed for use in bathroom conditions, the doors in oak and beech finishes are made with revolutionary and innovative CFL finishing (Continuous Foil Laminate), which allows the doors to be fully wrapped on six sides providing a seamless appearance and excellent resistance to moisture penetration. FIRA – the Furniture Industry Research Association is an independent testing and research body. The CFL process used on the oak and beech finish doors and fascias on the New England range has been awarded with FIRA's prestigious Innovation Award. The high gloss white doors are made from sturdy MDF with a tough, durable water resistant finish. They are the obvious choice for any new bathroom. In addition to the standard format, the 700mm, 800mm and 1000mm base units have been designed with two large deep self-close drawers as an alternative option for practical storage in the bathroom. A quieter life is guaranteed, as all of our doors are fitted with concealed soft-close hydraulic hinge technology to give a controlled and quiet closure.

Ceramic integral basins

The stylish ceramic basins complement the clean lines of the base unit, with the option of two different styles of basins to choose from. The elegant form of the New England basin or the fluid profile offered by the Eden basin - the choice is yours. Both basins include an integral overflow and single tap hole.

Mirrors & lighting canopies

Mirrors are available for the 500mm units and there are mirrors and canopy combinations available for the 620mm, 700mm, 800mm and 1000mm units. There are two styles to choose from, the full height mirrors which sit on the back of the basin or the shorter mirrors incorporating a useful shelf. The mirror and lighting canopies feature external high gloss finished shelves, fascias and cupboard doors where applicable. The lighting canopies can only be used with mirrors in the New England range. All mirrors and lighting canopies are fitted with a power socket for electric shavers and toothbrushes, infrared on/off switch and heated mirror pads as standard.

Back to wall WC units

We have developed back to wall WC units suitable for use as a stand alone unit or can be incorporated into the Linx System. Our optional 500mm back to wall WC unit, with its reduced width makes it ideal for small bathrooms, cloakrooms and en-suites. It saves on valuable space and therefore is incredibly practical. Please see the Range Selector Guide on pages 42-44 for further details.

The Linx System

Fitted furniture maintains its popularity within the bathroom, as it hides unsightly exposed pipework and gives the bathroom a spacious and uncluttered appearance. We have cleverly designed our products so they can be used as stand alone or fitted together using the Linx System. The Linx System allows our popular 620mm semi-countertop base unit and 700mm, 800mm and 1000mm vanity base units, with their practical slab top style basins, to be incorporated into runs of furniture alongside floorstanding storage units and our back to wall WC units. A variety of worktops, continuous plinths and infill panels complete the look.

Bathroom storage & companion pieces

Stylish yet practical storage space is always at a premium in the bathroom. Beautifully co-ordinated New England freestanding units and wall units can provide that much appreciated storage. The tall units are designed to add impact to your bathroom, as well as maximising storage. The short base units can be used as stand alone items or can be used to create a fitted run using the Linx System. Please see the Range Selector Guide on pages 42-44 for further details.

Worktop options

Skillfully constructed laminate worktops are available in four finishes: white, oak, beech and black granite, to complement or contrast with your choice of New England furniture. There are a number of worktop sizes available to suit your installation. Please note, if you decide to use a standard vanity base unit you must select the 19mm slimline worktops. Should you opt for the semi-countertop base unit, you must use the 28mm worktop.

Infill panels, plinths & cistern access hatch

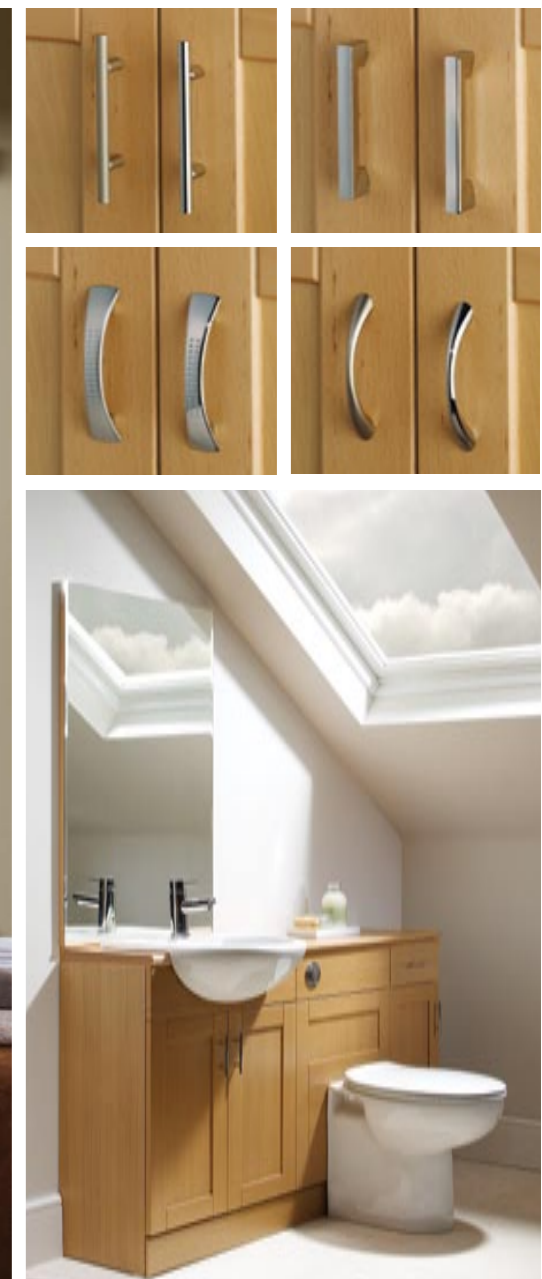

The infill panel, 300mm (w) x 820mm (h), provides the flexibility to design the layout you desire. For a fitted look using the Linx System, various plinth lengths are available. Plinths and infill panels can be cut down to size to suit the plan you have chosen for your bathroom. A matching cistern access hatch is available in all finishes for use with back to wall WC furniture.

Handles

There are four different handle styles each available in either satin chrome or chrome finish. Simply specify the style and number of door handles you require, remembering to allow for drawer handles when ordering.

Brassware

Our collection of designer taps perfectly complements your Roper Rhodes bathroom furniture. Please refer to our Taps & Accessories brochure and make your selection.

Eden basin

SPACE SAVING UNITS

With space at a premium in many bathrooms, New England space saving units offer useful storage and maximise space in even the smallest of rooms.

Shown is only a small selection of possible combinations - for your own personal look please see the Range Selector Guide on pages 42-44 for further details.

1. Beech finish corner base unit nvc6bh £211.74
 Corner basin btc600w £93.26
 Beech finish 620mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n79btwbh £246.11
2. Oak finish 415mm slimline base unit nvb4no £203.36
 New England 450mm basin bt450w £117.87
 Oak finish 500mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n579btwno £224.19

NEW ENGLAND STAND ALONE UNITS

Stand alone units offer a clean and cohesive look for your bathroom regardless of its size. If you don't have a large bathroom you can opt for one of our space saving base units. Should you have the available space, select from our wide range of standard size units and create as much storage as your bathroom will allow. The New England range offers a shaker style bath panel to complete the look.

STANDARD SIZE UNITS

Shown is only a small selection of possible combinations or size of base unit - for your own personal look please see the Range Selector Guide on pages 42-44 for further details.

1. White 700mm self-close drawer base unit nvb7wdd £370.13
Eden 750mm basin edbt750w £160.62
White 700mm mirror, shelf & canopy nmc700w £317.07
White 620mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n79btww £220.20

2. White 800mm base unit nvb8w £317.35
New England 860mm basin bt860w £200.77
White 800mm mirror, shelves, cupboard & canopy nmc8w £349.74

3. Soft-close door detail
Concealed soft-close hydraulic hinge technology for a smooth closing action.

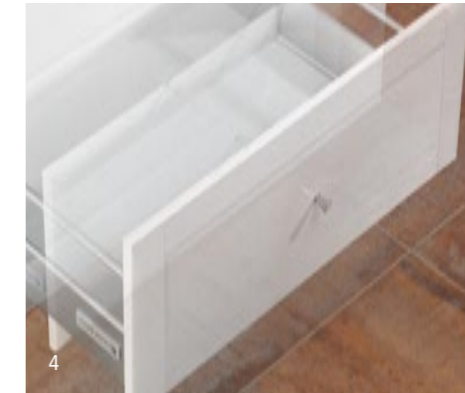

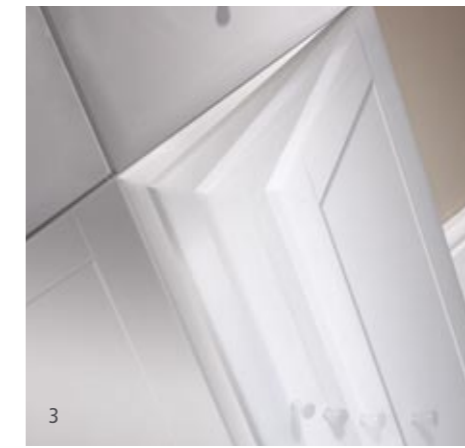

4. Deep self-close drawer detail
Large deep drawers have a controlled and quiet closure. In addition to this, there is a useful enhancement feature, which enables you to perfectly align the drawer.

5. CFL door detail
FIRA – the Furniture Industry Research Association is an independent testing and research body. The New England range has been awarded with FIRA's prestigious Innovation Award on the beech and oak finish CFL doors and fascias. Innovative CFL technology is specifically developed for use in bathroom conditions.

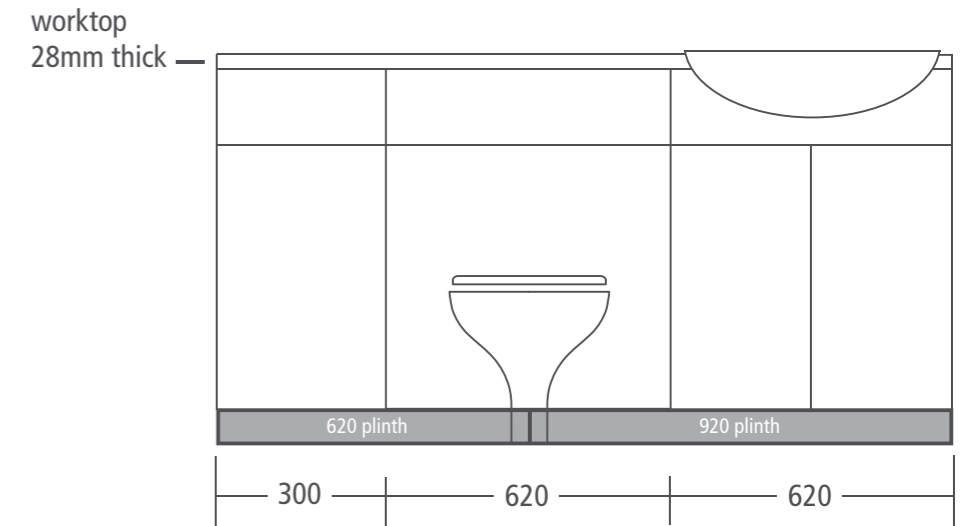

6. Oak finish 800mm self-close drawer base unit nvb8nodd £452.38
Eden 860mm basin edbt860w £194.30
Oak finish 800mm mirror, shelf, cupboard & canopy nmc800no £391.35
Oak finish 620mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n79btwno £246.11

SEMI-COUNTERTOP BASE UNIT USING THE LINX SYSTEM

The semi-countertop base unit comes in gloss white, oak and beech finishes. It is used in exactly the same way as the standard base units, alongside various floorstanding storage units. Infill panels, worktop options and continuous plinths complete the look. The 28mm thick laminate worktops are supplied with pre-finished edges in 506mm, 626mm, 1246mm, 1546mm and 1846mm lengths. The continuous plinths come in 620mm, 920mm, 1000mm, 1100mm, 1300mm, 1540mm and 1600mm lengths. When installing a fitted run of furniture which includes a back to wall WC base unit, two plinths may be required but the joint can be concealed behind the pan. Please see the diagram opposite for an explanation of how to assess the required plinth length. Many other configurations are possible, including corner installations by utilising the separately available infill panels. When planning your installation, pipework runs are an essential consideration.

NEW ENGLAND LINX SYSTEM

Fitted furniture maintains its popularity within the bathroom as it hides unsightly exposed pipework and gives the bathroom a spacious and uncluttered appearance. We have cleverly designed our products so they can be used as stand alone or fitted together using the Linx System.

STANDARD BASE UNITS USING THE LINX SYSTEM

The Linx System is available in gloss white, oak finish and beech finish and it allows 700mm, 800mm and 1000mm base unit to be incorporated into runs of furniture alongside floorstanding storage units and our back to wall WC units.

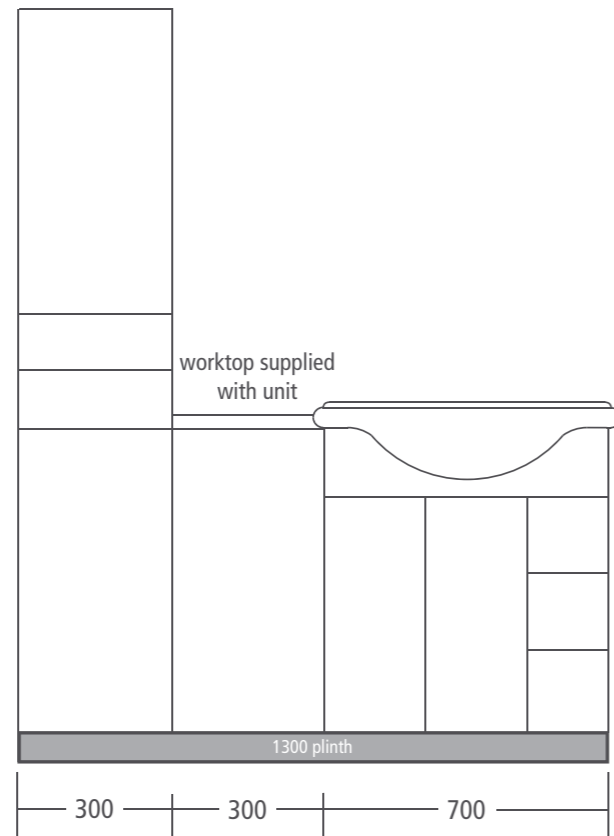

The 19mm thick laminate worktops are supplied with pre-finished edges in 506mm, 624mm and 1224mm lengths.

The continuous plinths come in 620mm, 920mm, 1000mm, 1100mm, 1300mm, 1540mm and 1600mm lengths.

When installing a fitted run of furniture which includes a back to wall WC base unit, two plinths may be required but the joint can be concealed behind the pan.

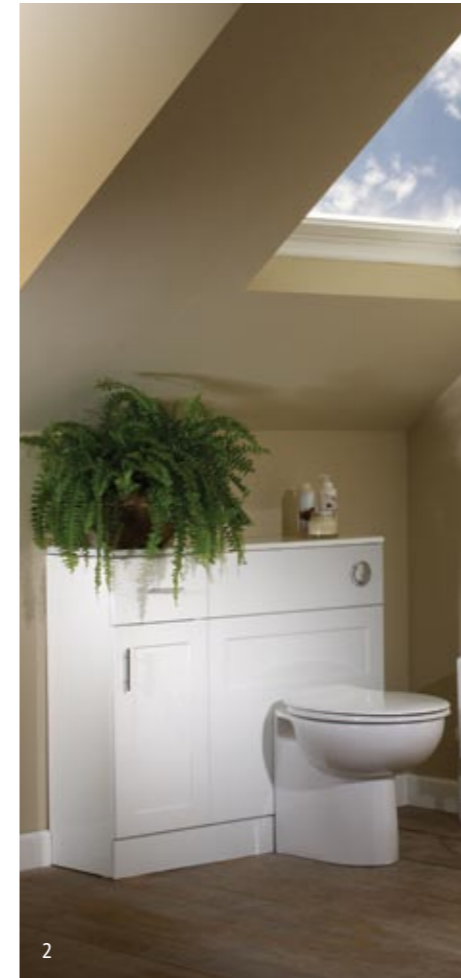

Please see the diagram for an explanation of how to assess the required plinth length. Many other configurations are possible, including corner installations by utilising the separately available infill panels.

When planning your installation, pipework runs are an essential consideration.

Shown is only a small selection of possible combinations - for your own personal look please see the Range Selector Guide on pages 42-44 for further details.

1. Beech finish 620mm semi-countertop unit (basin not supplied) n79sctbh £246.11
Beech finish 620mm mirror m620b £86.78
Beech finish 620mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n79btwbh £246.11
Beech finish 300mm floor cupboard n79fcbh £190.41
2. White 620mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n79btww £220.20

Beech finish 620mm back to wall WC base unit (pan not supplied, worktop to be ordered separately) n79btwbh £246.11
Beech finish 300mm floor cupboard n79fcbh £190.41

NEW ENGLAND FEATURES

1. New England ceramic integral basins
The elegant form of the New England basin includes an integral overflow and single tap hole.

2. Eden ceramic integral basins
Another option is the fluid profile offered by the Eden basin with its integral overflow and single tap hole.

3. Improved closing features
A quieter life is guaranteed as this range benefits from the added luxury of our soft-close doors and self-close large deep drawers to give a controlled and quiet closure. In addition to this, there is a useful enhancement feature, which enables you to perfectly align the drawer.

4. Drawers
The high quality smaller drawer units have a smooth, easy operation with metal sides and roller runners. The drawers can be removed for cleaning and an internal stop prevents accidental removal.

5. Heated mirror pads
Finally there is a solution to those steamed up and foggy bathroom mirrors. We offer integrated demister pads on our entire range of bathroom mirrors with canopies as standard. The demister pad will effectively heat the mirror to a few degrees above room temperature within 2-3 minutes preventing the mirror from misting in even the steamiest of bathrooms. Heated mirror pads are switched on automatically with the canopy lights and no additional wiring is required. The demisting effect will spread approximately 10-20% further than the pad itself and is very economical to run.

6. Shaver & toothbrush power sockets
All New England lighting canopies are fitted with a power socket for electric shavers and toothbrushes. This is concealed in units with cupboards. As an additional feature of New England canopies, the shaver socket can be operated independently to the lights and heated mirror pad. This allows use of the power socket without the canopy lights switched on - a red LED indicates power on/off.

7. Soft-close hinges
The Infinity toilet seat features soft-close hydraulic hinges for controlled and quiet closure of seat lid and ring.

8. CFL doors
The New England doors in oak and beech finishes are made with revolutionary and innovative CFL finishing (Continuous Foil Laminate), specifically developed for use in bathroom conditions. It allows the doors to be fully wrapped on 6 sides providing a seamless appearance and excellent resistance to moisture penetration. FIRA – the Furniture Industry Research Association is an independent testing and research body. The New England range has been awarded with FIRA's prestigious Innovation Award on the beech and oak finish CFL doors and fascias.

9. Infrared sensor
A safe and easy to use infrared on/off switch enables the user to activate the lighting and heated mirror pad without the need to touch the mirror. Simply move your hand in front of the sensor to activate.

10. Co-ordinating toilet seats & bath panels
The Infinity slim profile, anti-bacterial, thermostet, plastic toilet seat is the natural choice to co-ordinate with the sanitaryware. There is a choice of conventional or soft-close hinges. For a fully integrated look, why not choose a co-ordinating bath panel. Front panels for 1700mm long baths and end panels for both 700mm and 750mm wide baths are available in high gloss white, oak and beech finishes. Supplied with adjustable plinth to enable easy installation, especially on baths that are already fitted.

Electrical Specification

Lighting canopies: All canopies include shaver/electric toothbrush socket. Lighting canopies can only be fitted to New England mirrors.

Electrical specification: New England lighting canopies with shaver sockets and heated mirror pads have been designed and independently tested for compliance to British Electrical Equipment (Safety) Regulations 1994. Standards applicable are: **BS EN60598-2-6:1995**, **BS EN60742:1996**, **BS EN61558-2-5:1998** and **BS EN60335-2-30:1997**.

Lighting canopies are Class II double insulated - no earth connection required. Canopies are supplied with 500mm cable and should be connected to a fused 3 amp supply. Electrical connections should be made according to national wiring regulations. Installation by a competent electrician is advised. Canopies are suitable for use in bathrooms - but should not be used in a sauna or shower cubicle. Canopies should not be located where they will be directly splashed by shower spray, or such that they can be operated by someone whilst in the bath. New England lights use low voltage halogen (12 volt, 20 watt) type G4.

Shaver socket: Suitable for shavers and rechargeable toothbrushes. Maximum power output 20VA. The shaver socket is switched independently to the lights. It is recommended that the shaver socket is switched off when not in use.

Heated mirror pads: Operated automatically when the canopy lights are switched on using the IR sensor. No additional electrical connections are required.

For taps, wastes and traps please refer to our Taps & Accessories brochure.

EDEN

Eden has been designed to offer a range of freestanding or wall-hung washstations with a choice of complementary bathroom storage units. Available in oak finish or high gloss white finish with contemporary aluminium framed frosted glass doors. Eden offers all the benefits of a modular range of furniture that is sure to make a strong style statement for your bathroom.

EDEN RANGE ELEMENTS

Washstations

The fusion of frosted glass and aluminium gives Eden its distinctive and ultramodern look. Eden washstations are available in a choice of oak or high gloss white finishes. The oak washstations have real wood veneer fascias with matching oak finish internal and external surfaces. High gloss white versions feature fascias made from sturdy MDF with a durable water resistant finish. All external surfaces are finished in a matching high gloss finish.

The washstations are available in three popular sizes: 500mm, 700mm and 800mm to suit cloakroom, en-suite and master bathroom installations.

Wall-hung or freestanding

Continuing the contemporary theme, Eden washstations have been designed to allow either wall-hung or freestanding installation.

Wall-hung furniture, popularised by continental European bathrooms, gives a feeling of space and allows easy cleaning of floor surfaces.

Should you prefer, the addition of the beautifully co-ordinated optional footstands can transform Eden into a more conventional yet no less striking freestanding configuration.

Ceramic integral basins

The contemporary clean lines of the slab top ceramic basins perfectly harmonise with the sleek design of the washstations. All basins support the fitting of a monobloc tap as standard.

Mirrors

The Eden mirror is designed for use with any of the three washstations and, depending upon your preference, can be mounted either horizontally or vertically. The frosted edge design reflects the detailing in the washstations and storage units. The mirror can be used with or without the optional Eden light fitting.

Cabinets

Beautifully manufactured bathroom cabinets offer an alternative to the Eden mirror for those seeking additional storage space. Again this is suitable for use with any of the Eden washstations and can be used with or without the optional light fitting.

The overlapping cabinet doors provide an easy-to-use and cleverly concealed handle without compromising on the design of the cabinet.

Light fittings

A not to be missed aluminium light fitting designed specifically to co-ordinate with the Eden mirror and cabinets is also available.

It is supplied complete with a simple light fitting kit and pull cord switch. Alternatively it can be remotely switched from elsewhere in the bathroom if preferred, as demonstrated in this brochure.

Brassware

Our collection of designer taps perfectly complements your Roper Rhodes bathroom furniture. Please refer to our Taps & Accessories brochure and make your selection.

EDEN FEATURES

Roper Rhodes remains committed not only to first-rate design but also to go beyond aesthetics and to provide thoughtful features to make your bathing rituals more pleasant. This attention to detail is demonstrated by the use of specialised highest quality fittings throughout the Eden range.

1&2. Doors and drawers

Eden drawers have a smooth, easy operation with metal slides and roller runners. The depths of the drawers are generous and provide ample storage. The drawers can be removed for cleaning and an internal stop prevents accidental removal. The discrete, concealed drawer featured on the tall unit provides storage for those hard to find smaller items that always get lost in larger drawers (see image 2). The aluminium-framed doors with toughened frosted glass panels offer the latest look in bathroom styling and design. A quieter life is guaranteed, as all doors are fitted with soft-closing hydraulic buffers. Hinges are self closing and fully adjustable (see image 1). A slim-line T-bar handle offers ease of use without compromising clean lines.

3. Ceramic integral basins

The slab top ceramic reflects beautifully the contemporary design of the washstations. All basins support the fitting of a monobloc tap as standard.

4. Light fittings

Made from aluminium, the contemporary single fluorescent light is designed specifically for use with Eden cabinets and mirrors. It is supplied complete with a simple fitting kit. Eden lights have been CE approved and comply with all British safety regulations.

Bath panels

A contemporary bath panel that perfectly complements the Eden range of modular bathroom furniture is also available. Supplied in either oak or high gloss white finishes it comes complete with an adjustable plinth.

Electrical Specification

Eden lights are class II double insulated - no earth connection required. Electrical connections should be made according to IEE national wiring regulations. Installation by a competent electrician is advised. Eden lights are suitable for bathroom use, but should not be located in a sauna or shower cubicle. The lights should be installed in 'zone 3' or 'outside zones' of the bathroom in accordance with the latest IEE regulations. Eden lights have been designed and independently tested for compliance to British Electrical Safety Standards including: BS EN 60598-1: 2000 AMD: 2001, BS EN 60598-2-4: 1988. Eden lights use type T2 (8 watt) fluorescent tubes.

For taps, wastes and traps please refer to our Taps & Accessories brochure.

FURTHER BATHROOM COLLECTIONS FROM ROPER RHODES

This brochure contains only a selection of the full range of products available from Roper Rhodes. Our other collections are illustrated below, please ask your retailer for more information or visit www.roperrhodes.co.uk.
